The \underline{Q} Ideographies as Heuristic, Intentional-Intuitional Connotational Calculi.

The 'Meta-Systematic Dialectical' Progression of Systems of Dialectical Arithmetic Beyond $\underline{N}\underline{Q}$ – A Self-Progression of Increasingly-Extensional Dialectical Languages with Ever-Growing Capacity to Express Empirically-Verifiable 'Quanto-Qualitative' Determinateness/Specificity/Concreteness/Complexity, Modeled via the Language of the $\underline{N}\underline{Q}$ Dialectical Ideography.

Aside: Hybrid Ontos -- Subsumption of the Extant by the Emergent Transition from "Formal Domination" to "Real Domination" . . .

Comment: Relativity of the Categories "System" vs. 'Meta-System'; "Evolution" vs. 'Meta-Evolution'; "Dynamic" vs. 'Meta-Dynamic'.

Comment: The Darker Side of the Dismal Science: Reverse-Subscript Connotations [their mere implicitude in $\underline{N}\underline{Q}$, vs. their greater explicitude in $\underline{z}\underline{Q}$ & $\underline{g}\underline{Q}$].
