PRESS RELEASE

***Fundamental Hypothesis* Regarding the Dialectical Historical Dynamics of *Modern, Capitalist Society*.**

The metric of the human social forces of production is a measure of the unified, Darwinian and 'Meta-Darwinian' fitness of the human species, because that metric measures the rate of human-societal [self-]reproduction, both actual and potential -- actual, for the past, up to the present of the human species, therefore also potential, for the future of the human species -- thus measuring the combined, biological, Human-Genomic, Darwinian fitness of humanity, and the 'Meta-Darwinian', cultural, 'Human-Phenomic' fitness of humanity, together, as one.

The turn, from the “ascendance-phase” to the “descendance-phase” of the capital-centered system of social relations for the reproduction of human society is driven by the growth of the human social forces of production to a level beyond that at which, core, concentrated-ownership industrial capital, hence capitalism itself, can be profitable for its core ruling class.

That is, this turning point is the point after which the losses to core, concentrated-ownership industrial capital-value profitability, due to the 'technodepreciation' of ever-increasing portions of its fixed-capital-embodied capital-value, caused by further growth of the social forces of production, and by the competition-enforced retirement and periodic write-off of ever-increasing portions of that fixed-capital-value, against earnings, out-balances the gains to earnings -- to core, concentrated-ownership industrial capital-value profitability -- due to the heightened “factor productivity”, and the reduced unit costs of production, also caused by that further growth of the social forces of production.

Thereafter -- after that turning point -- the superficial appearance of core, concentrated-ownership, core-ruling-class-owned industrial capital profitability, and the economic enforcement of that superficial appearance, can only be maintained by drastic and draconian measures, measures which increasingly squander, destroy, and reverse the historic growth of the human social forces of production, which increasingly “de-industrialize” the geographical capitalist core, and which also otherwise compromise and impair human social reproduction, and which thus, more and more -- and at an accelerating rate, as this “descendance phase” of modern society ensues -- reduce the combined, Darwinian, human-Genomic, and 'Meta-Darwinian', 'human-Phenomic' fitness of the planetary human species, impending a 'descendance-phase denouement' of ruling-class-imposed [self-] extinction of that planetary human species.

That is, the psycho-socio-political-economic phenomena that are the consequences of that turning point transform the once-progressive ‘ascendance-phase ruling-class’ into a ‘hyper-degenerate’, ‘descendance-phase ruling-class’, characterized by *contradictory* ideologies which can be described as ‘*Human Anti-Humanism*’ [“‘local’” historical name: “*Eugenics*”], ‘*Capitalist Anti-Capitalism*’ [including protracted suppression of *capitalist* industrialization in the capitalist “hinterland”, the “periphery” of the geographical capitalist core, creating the “Third World”], and inverted, perverted application of the lessons of the human-social sciences developed in the “‘ascendance phase’”, so as to reverse human progress by reversing the growth of the social forces of production [“‘local’” historical description: ‘*Anti-Marxian Marxianism*’].

This ‘hyper-degenerated’ ruling class thus promotes, in stealth, policies of police-state, totalitarian *state*-capitalism, and of “*Eugenics*”, i.e., of genocide -- of global wars of mass extermination, of global *multi*-genocides; of both overt and covert, stealth genocides, and of catastrophic, Neo-Malthusian “population reduction”.

This ‘hyper-degenerated’ ruling class does so, eventually, in part, via its promotion of various varieties of “People Are Pollution” ideology, of new anti-progress, anti-science, anti-“technology”, ‘descendance-phase ideologies’, such as we have seen “‘locally’”-- e.g., a plutocracy-funded global resurgence of Dark Ages Religions, of Neo-Luddite “Back-to-Nature”-isms and “Neo-Primitivisms”, of “Small-Is-Beautiful”-isms [i.e., of ‘Weak-is-Beautiful-ism’ re: the collective political power of the working-class to defend itself against ruling-class-imposed contracted social reproduction], of voluntary self-destitution of the working class for the sake of “The Environment”, of “Zero [i.e., *negative*] Economic Growth” for the global majority / working class, of “Zero [i.e., *negative*] Population Growth” for the global majority, of Animalism, etc., etc., *ad nauseam*.

In sum, this ‘hyper-degenerated’ ruling class -- in order to maintain its rule against the ‘technodepreciation’ of the core-capital-value economic foundation of its power; against the overthrow of its foundation by the growth of the social forces of production -- is hell-bent on imposing a new, neo-feudal Dark Ages upon the majority of global humanity, with the core of that ‘descendance-phase ruling class’ as the ruling, New Dark Ages neo-/pseudo-“aristocracy”.

However, this New Dark Age is likely, contrary to the demented intentions and ‘hyper-unrealistic’ expectations of the ‘descendance-phase ruling class’, to quickly become a *permanent*, ‘*Final Dark Age*’ for planet Earth -- one which not even the ‘exo-human’ planetary biosphere can survive -- in the form of a rapid, self-imposed *extinction* of the human species, *including* of that ‘Neroan’, ‘Caligulan’ ‘descendance-phase ruling-class’ itself, albeit itself so included contrary to its/their will.

When a sun-like star -- imprisoned by the ‘self-force’ of the ‘self-destiny’ determined by its own, inner ‘intra-duality’ [its own “‘essence-ial, inescapable, dialectical, internal, *self*-contradiction’”] of self-caused, self-gravitational self-contraction, and of its opposing, self-contraction-induced core fusion thermonuclear self-expansion -- converts ~all of its core Hydrogen into core Helium, and begins to “burn” the Helium “ash” that remains there, it leaves the “stellar Main Sequence”, enters its ‘stellar descendance phase’, and heads toward stellar death.

Like such a sun, modern human society, capital-centered society, when the ‘intra-duality’ of core capital no longer “nets-out” on the side of “self-*expanding* value” [Marx], through the reinvestment of surplus-value into new constant capital and new variable capital, but, instead, begins to “net-out” on the opposite side, on the side of “self-*contracting* capital-value” [Seldon], due to accelerating ‘technodepreciation’ of high-fixed-capital-composition core-capital, modern society too enters its “‘descendance-phase’” -- enters a decline in its ‘social self-reproductive self-force’, a decline in its social-reproductive *fitness*, which likewise destines it for self-destruction.

Luckily for us, human societies -- evolved later than, and, consequently, at a higher 'meta-fractal' scale of 'inclusion complexity' than, stars -- contain greater "degrees of freedom" than do, more deterministic, stars, so that there is still hope that we humans can pull out of the tail-spin of our "descendance phase" *as capital*.

To start "pulling out", and "pulling up" from our present and longstanding tail-spin into a New/Final Dark Age; to restart human progress; to resuscitate/regenerate human social reproduction, to begin to re-grow the human social forces of production -- the very 'self-forces' of human, societal self-reproduction, of human-social 'self-productivity' -- we must, collectively, 'human-Phenomically', learn something fundamental, yet new [to us].

We must learn to distinguish, conceptually, and to separate, in practice, capital from "technology", capital from advanced-productivity means of production, and capital "profitability" from human-social "profitability" -- from human-species fitness-maintaining and fitness-expanding human-social 'self-reproductivity'.

If and when enough of us do so, then humanity can leave capital behind, i.e., we can subsume it, «*aufheben*» "contain" it, "contain" its dangers, and move on -- move up -- into the first-ever **Global Renaissance** of humanity, a renaissance of humanity as "the associated producers", the producers of a re-accelerated growth of the social forces of production, the 'self-producers', the producers of a newly-growing planetary, 'planetized' humanity, expanding beyond our planet.

"Overcome, we, the *Iblis* within ourselves, and the cosmos will be our canvas."

"We ourselves will be our work of art."

"We ourselves will be our work of art."

-- Karl Seldon
